CJ 7350E. Discrete Multivariate Models.
This course focuses on regression models for discrete outcome variables, sometimes called limited or categorical dependent variables. Topics include maximum likelihood estimation, binary and multinomial logistic models and negative binomial models. Prerequisite: CJ 7321 or its equivalent or approval/permission of both the instructor and the Doctoral Coordinator.

about Discrete Multivariate Models

CJ 7350F. Environmental Criminology.
Crime distributes unevenly in space/time. As such, the course examines such questions as (1) What places are dangerous? (2) Why do we study specific crime types? (3) Where do crime types concentrate? (4) Where do offenders go in their normal activities? (5) What are the temporal patterns for crime? Prerequisite: CJ 7311 or its equivalent or approval/permission of both the instructor and the Doctoral Coordinator.

CJ 7355G. Seminar in Macro Criminology.
This course has a macro focus, examining criminological theory and research that takes cities, geographical regions, states, and nations as the units of comparison. The importance and relevance of macro criminology for understanding the causes of crime and key criminal justice issues, such as police resources, are explored in depth. Prerequisite: CJ 7311 or its equivalent or permission of both the Instructor and the Doctoral Coordinator.

CJ 7350I. Introduction to Structural Equation Modeling.
The course provides an introduction to structural equation modeling, which is sometimes called mean and covariation structure analysis or latent variable analysis. Topics include recursive and non-recursive models, path analysis, measurement models, and factor analysis. Prerequisite: CJ 7321 or its equivalent or approval/permission of both the instructor and the doctoral coordinator.
