This course provides students with an understanding of the relationship between psychology, investor behavior, and financial market efficiency. While market participants may believe that they are acting rationally when making investment decisions, often they are influenced by irrelevant information or ignore pertinent factors. Students will be presented with recent research in the field of behavioral finance. Attention will be given to sports betting markets; such markets provide a useful model for analyzing investor behavior. The course also includes an in-depth examination of sports as a business. Specifically, students will analyze financial decision-making in the NFL, MLB, NHL, NBA, and horse racing. about Behavioral Finance and the Business of Professional Sports
