No minor is required, but students may choose a minor.

The course work for the Practicum Option within the Applied Sociology major culminates in the two-course practicum, SOCI 5398A/5398B. Each student will initiate a site-based research project to collect impact analysis or assessment data of interest to site administrators. During a subsequent term, the student will complete a professional research paper based on the data. Students will be required to have a practicum proposal approved by their committee prior to beginning the research paper.

Although students’ research projects will vary, each will combine the emphases of the program — sociological methods and statistics, needs assessment, impact analysis, and grant writing — with the collection and analysis of quantitative and/or qualitative data.

All students earning the M.S. major in Applied Sociology must pass one or more comprehensive examinations, either written, oral, or both at the end of their course work. Defense of the professional research paper, as well as knowledge of course work, will be the foci of this comprehensive examination.
