As Williamson County continues to experience significant annual growth — the population now exceeds 600,000 — the University Master Plan positions the Round Rock Campus to continue serving the needs of the area. Collectively, Texas State University's Round Rock Campus (<http://www.rrc.txstate.edu/>) (RRC) provides instructional and lab space, administrative offices, and student support services. The RRC offers upper-level courses leading to baccalaureate degrees in an array of disciplines including health professions as well as offering select master's degrees and Physical Therapy doctoral program. The needs of Central Texans are further served through certifications and continuing education, online and distance learning opportunities for working adults, professionals, and lifelong learners.

The RRC offers daytime and evening classes for students interested in completing their degree programs while fulfilling other obligations. From its inception, the Round Rock Campus (<http://www.rrc.txstate.edu/>) (RRC) offered face-to-face classes after 5:00 p.m. for working adults as well as hybrid and online courses. Students can complete their freshman- and sophomore-level classes at the San Marcos Campus, at a community college or at other accredited institutions before transferring to Texas State University.

Undergraduate Degree Programs

The RRC offers junior and senior level undergraduate classes. To transfer to the Round Rock Campus, it is recommended that students have at least 45 transferrable hours. For more information about admission, application, and registration, please visit the Undergraduate Admission website: <https://www.admissions.txstate.edu/future-students/apply-for-admission.html>, or call Academic Student Services office at 512-716-4001.

Graduate Degree Programs

The RRC offers master's degree programs and a professional doctorate in physical therapy (<https://www.rrc.txstate.edu/academics/masters.html>). For more information about admissions requirements and application procedures as well as the list of programs, visit The Graduate College website at www.gradcollege.txstate.edu (<https://www.gradcollege.txstate.edu/>), call 512-245-2581, or email gradcollege@txstate.edu. The Graduate College welcomes your interest.
