The two disciplines that have a home in this department, Philosophy & Religious Studies raise some of the most fundamental questions about our world and ourselves—questions about the nature of reality, knowledge, morality, God, and society. Students study the thinking of major scholars on such matters and learn to think critically and clearly on their own. Our small classes cultivate student-faculty mentoring, research and learning. Our faculty—professional philosophers and scholars of religion, authors and leaders in the field—work one-on-one with students, encouraging independent research and professional preparation. And our co-curricular activities and organizations build strong rapport and camaraderie between our students, most notably by participation in dialogue. By fostering a love of learning, an appreciation of the value of critical and reflective thinking, and a collaborative intellectual community; we help prepare our students to become engaged, reflective citizens and lifelong learners while preparing them for graduate study or careers in government, law, the non-profit sector, business, or education.

The Department of Philosophy serves our majors and minors by providing an intensive and flexible course of study through which they rigorously engage in reflection and dialogue, logical analysis, conceptual interpretation, and develop and critique texts, arguments, and ideas. We help them develop a broad competence in critical thinking and analysis of arguments. Philosophy and Religious Studies students pursue the study and understanding of diverse positions and perspectives, and are encouraged to consider the relevance of their course of study for their post-graduate plans.

Since philosophy is the home of the study of logic and the principles of good argumentation, it lends itself well to being joined with virtually any course of study. Philosophy students are highly valued for their communication skills, their ability to make ethical decisions and their adaptability in new situations. Through the study of philosophy, we learn how to explain why we know what we know and believe what we believe. Not only does this ability make us stand out as citizens and leaders, it also helps us navigate life’s choices and better understand our world.

Religion intersects with all areas of culture including politics, science, economics, and law. This intersection of religion and culture is reflected in a wide variety of careers found across the spectrum of cultural work, human services, education, and the arts, such as hospital chaplaincies, secondary education, legal support work, and journalism. Furthermore, the conditions of globalization mean that there will be increasing demand for job candidates who can negotiate culturally diverse work environments. Knowledge of the world’s religions is needed in business, law, health, law enforcement, and politics both national and international. Religious literacy is essential to responsible citizenship, and increasingly demanded by employers.

Our graduates have pursued careers in business, journalism, law, medicine, education, public safety, and the arts. In these cases our former students realize that the successful practitioner is a good thinker, a clear communicator, and a culturally aware and morally responsible person. The courses of study offered in this department offer opportunities for students to develop their critical and creative powers, other students develop an interest in becoming professional philosophers or scholars of religion, and enroll in some of the nation’s best graduate programs in philosophy or religious studies.

For those students with special interests in a particular area, the department offers the following recommendations:

**Pre-Professional Study of Philosophy**

Students interested in pursuing graduate work in philosophy are advised to complete the B.A. with a major in Philosophy and to take:

<table>

Students with a primary interest in Western thought should also develop a language proficiency in Spanish, French or German. Those interested in Asian philosophy are advised to study Japanese or Chinese, and those who wish to pursue Medieval or Islamic thought should study Arabic.

**Pre-Law and the Study of Philosophy**

Pre-law students often pursue an undergraduate major in philosophy, often as a second major. Given the importance that both philosophy and law attach to analysis, argumentation, and the evaluation of evidence, adding a major in philosophy serves students well as they prepare and complete entrance exams and interviews, and also in the study and practice of law. Pre-law students should also consider taking the following electives:
