Philosophy raises some of the most fundamental questions about our world and ourselves—questions about the nature of reality, knowledge, morality, God, and society. Students of philosophy study the thinking of major philosophers on such matters and learn to think critically and clearly on their own. Our small classes cultivate student-faculty mentoring, research and learning. Our faculty—professional philosophers, authors and leaders in the field—work one-on-one with students, encouraging independent research and professional preparation. And our co-curricular activities and organizations build strong rapport and camaraderie between our students. By fostering a love of learning, an appreciation of the value of critical and reflective thinking, and a collaborative intellectual community, we help prepare our students to become engaged, reflective citizens and lifelong learners while preparing them for graduate study or careers in government, law, the non-profit sector, business, or education.

The Department of Philosophy serves our majors and minors by providing an intensive and flexible course of study through which they rigorously engage in philosophical reflection and dialogue, logical analysis, conceptual interpretation, and develop and critique texts, arguments, and ideas. We help them develop a broad competence in critical thinking and analysis of arguments. Philosophy students pursue the study and understanding of diverse philosophical positions and perspectives, and are encouraged to consider the relevance of philosophy for their post-graduate plans.

Since philosophy is the home of the study of logic and the principles of good argumentation, it lends itself well to being joined with virtually any course of study. Philosophy students are highly valued for their communication skills, their ability to make ethical decisions and their adaptability in new situations. Through the study of philosophy, we learn how to explain why we know what we know and believe what we believe. Not only does this ability make us stand out as citizens and leaders, it also helps us navigate life’s choices and better understand our world.

Some philosophy majors pursue careers in business, journalism, law, medicine, and education. In these cases students recognize that the successful practitioner is the good thinker and turn to philosophy to develop their critical and creative powers. Other majors develop an interest in becoming professional philosophers and enroll in some of the nation’s best graduate programs in philosophy.

For those students with special interests in a particular area, the department offers the following recommendations:

Pre-Professional Study of Philosophy

Students interested in pursuing graduate work in philosophy are advised to take:

<table>
<thead>
<tr>
<th>Code</th>

</tbody>
</table>

They should also develop a language proficiency in Spanish, French or German.

Pre-Law

All pre-law students should consider an undergraduate major in philosophy, given the importance that both philosophy and law attach to analysis, argumentation, and the evaluation of evidence. Pre-law students should also consider taking the following electives:
