College of Science and Engineering

Dean
Christine E. Hailey, Ph.D.
Centennial Hall Room 201
Telephone: 512.245.2119 Fax: 512.245.8095
http://www.cose.txstate.edu/

Associate Dean
Chad Booth, Ph.D.

Department Chairs/School Directors
Biology—Dittmar Hahn, Ph.D.
Chemistry and Biochemistry—William J. Brittain, Ph.D.
Computer Science—Hongchi Shi, Ph.D.
Engineering—Chad Booth, Ph.D., Interim
Engineering Technology—James Wilde, Ph.D.
Mathematics—Susan Morey, Ph.D.
Physics—Mark W. Holtz, Ph.D.

The College of Science and Engineering has a triple mission:

Preparing students for careers in science, technology, engineering, mathematics (STEM) and STEM education and imparting core knowledge in science and mathematics to all students.

Providing an environment in which faculty can develop and sustain nationally prominent research programs.

Serving the citizens of Texas and the nation with educational and research programs that facilitate innovation and economic development.

To ensure an understanding of basic scientific and engineering concepts, the College offers extensive opportunities for student participation. Students gain experience in laboratories, interact with the environment through field studies, conduct undergraduate research, participate in design experiences and train using technologically advanced instrumentation. A combination of student participation, rigorous classroom instruction, and "hands on" experiences gives majors a competitive advantage in career advancement or in the selection of professional or graduate programs. The non-science major is assured of a competitive advantage in career advancement or in the selection of appropriate courses, transfer and correspondence courses, academic probation/suspension, the choice of an educational program leading to a bachelor's degree, and participation in pre-professional concentrations. The Advising Center is a resource for current students who are considering a science or engineering major or pre-professional concentration and provides assistance for students applying for graduation. Career and professional counseling is available in the academic unit of the student's major and through Career Services.

Teacher Certification

Currently, there are six Texas science- and math-related teacher certification programs available at Texas State University:

• Chemistry (B.S. major in Chemistry),
• Life Sciences (B.S. major in Biology),
• Mathematics (B.S. major in Mathematics),
• Physical Science (B.S. major in Chemistry or a B.S. major in Physics),
• Physics/Mathematics (B.S. major in Physics),
• Science (B.S. major in Interdisciplinary Science), and

Students seeking any of these certifications need to follow coursework leading to a degree in the appropriate science field, in addition to taking the required certification courses. Relevant information can be found within each departmental section of the catalog. Initial or additional certification may also be acquired as a post-baccalaureate or graduate student.

Students interested in certification are strongly encouraged to see the Science and Engineering Advisor early in their undergraduate program or certification process.

The Bachelor of Science (B.S.) major in Interdisciplinary Science is designed to broadly train students in a wide spectrum of science disciplines in preparation for the Science teacher certification exam for grades 7 through 12. Admission into the program requires both admission to the university and to the Educator Preparation Program. The Educator Preparation Program admittance requirements are found in the College of Education section of this catalog. Students successfully completing the program and the Science teacher certification exam will be prepared to teach any high school science subject and in informal science educational settings within communities. There is a high job market need for science teachers nationally and in Texas. Students must enroll and complete all of the required courses in the following degree plan in order to sit for the teacher certification exam.
Bachelor of Science (B.S.)

- Major in Interdisciplinary Studies (Teacher Certification in Science, Grades 7-12) (http://mycatalog.txstate.edu/undergraduate/science-engineering/interdisciplinary-teacher-certification-grades-7-12-bs)

Minors

- Second Teaching Field in Physical Science (Grades 6-12) (http://mycatalog.txstate.edu/undergraduate/science-engineering/second-teaching-field-physical-science)
